

A hash & using a hash in a function:

```
my_hash = {  
  name: "Alice",  
  age: 26,  
  location: "Edinburgh"  
}  
  
def get_name(hash)  
  return hash[:name]  
end  
  
puts get_name(my_hash)
```

Result of the function:

```
➔ evidence git:(master) ✗ ruby arrays_and_hashes.rb  
Alice
```
